—D. A. Gelvin last Friday shipped to Chicago 85 head of cattle that he had purchased from G. H. Cowan. They were pronounced by all who saw them a splendid bunch of cattle. Mr. Cowan is entitled to credit for getting his cattle in such fine shape, and Mr. Gelvin opened the eyes of the hunters for top-notch at Chicago. It is needless to say that both got considerable cash out of them. —Maitland Herald.

—“Tell me of somebody who wants a farm loan,” said a loan agent to a physician the other day. “Farm loan, then,” the farmers are lending money now, not borrowing.” This was the answer, and in these few words is expressed a mighty significant as well as a mighty pleasant fact to contemplate.

Postmaster Curry says that the volume of mail dispatched from the Oregon postoffice since the holiday rush began 10 days ago, is fully 20 per cent greater than up to the same date a year ago. The volume of incoming mail is about the same as at this date last season. This fact we believe may be accepted as the best evidence that our little city has shared to the fullest extent in the general prosperity of the country. During Friday and Saturday last, the bundles and packages of every description were piled high indeed upon the mailing tables.

—When taxpayers cease to be sequenters of property and when they make a complete report to the assessor, then the grafter will go out of business. There is little relation between the two, perhaps, but they are both animated by exactly the same kind of human nature, and when we get rid of that kind of human nature, there are a good many things that will be very much different.

Some of the weather prognosticators are working overtime. We have heard that the first three days of winter represented the first months of winter, and that all the good weather we've had this fall has to be placed on the other side of the ledger in the spring; that is, we will have as much bad spring weather as we have had good fall weather. We have come to the conclusion that nobody knows about this matter.
